Welcome

Wishing you the joy of family, the gift of friends, and the best of everything for the New Year! Please enjoy this issue highlighting all the novel gifts that ADA has to offer for 2016.

Diabetes Education

We are happy to announce that ERP will be hosting the ERP DSMES Recognition Symposium in San Francisco, California on March 4, 2016. This symposium will provide attendees with 7.25 CMEs and cover the following learning objectives:

- Describe the National Standards for DSMES and the requirements to develop a program, annual requirements and maintain audit ready status
- Identify the steps in developing a multiple site DSME program
- Differentiate the role of the professional and para-professional in a DSME program
- List the preparation steps for a successful on-site audit
- Identify best practices, templates, and resources available for the development or improvement of a DSMES program design
- Demonstrate an understanding of DSMES and MNT reimbursement by Medicare

When:
Friday, March 4, 2016
7:30 AM - 5:00 PM
Pacific Time

Where:
Hyatt Regency San Francisco 5
Embarcadero Center San Francisco, California 94111

Fee:
$150.00
Registration
Fee for ERP Symposium

Resources

Pre-Conference Workshop: Advocating on Behalf of the Student with Diabetes: (being held before the Association’s Annual Advanced Postgraduate Course.)

Friday, March 4, 2016: 10:00-11:30 am
Hyatt Regency, San Francisco, California

Many students do not have anyone available at school to perform or assist with diabetes care tasks. The solution recommended by the American Diabetes Association is to train school staff members to perform these tasks when a school nurse is not available. This free workshop will cover the Safe at School campaign, applicable federal and state laws, written care plans, school diabetes management and the role of health care professionals. It is designed for physicians, certified diabetes educators, nurses and other healthcare professionals with an interest in pediatric diabetes care. CE credit will be offered.

Presenters

• Anastasia Albanese-O’Neill, PhD, ARNP, CDE
• Crystal C. Jackson, Director, ADA Safe at School

Registration

If you plan to attend the Postgraduate Course, you may register for the pre-conference workshop at the same time at professional.diabetes.org/pg16

If you are only registering for the pre-conference workshop, please send an email with your contact information, to Tamika Scott: TScott@diabetes.org.

Read the latest issue of Diabetes Docket
The feature story in the Fall 2015 issue is the new Position Statement: Diabetes Care in the School Setting. Based on the Association’s current Standards of Care, the statement provides diabetes management recommendations for students with diabetes in the elementary and secondary school settings. This issue of Diabetes Docket also includes articles about the Department of Transportation’s new Diabetes Rule, Safe at School laws in Arkansas and Hawaii, recent Supreme Court decisions that affect people with diabetes – and the free Advocacy App to download. Find previous issues of Diabetes Docket.

Books

Clinical Care of the Diabetic Foot, 3rd Edition
David G. Armstrong, DPM, MD, PhD, and Lawrence A. Lavery, DPM, MPH

Written and revised by recognized leaders in the field of diabetic foot care, Clinical Care of the Diabetic Foot is the essential handbook for all clinicians, health care providers, and educators who help diabetes patients avoid this devastating complication. Completely revised and updated, the third edition offers information on screening, healing, and prevention.

Program Spotlight

American Diabetes Association Camps are one of a kind. They are a welcomed oasis to the children living with diabetes each and every day. Association diabetes summer camps have been in existence for nearly 70 years, and in 2015 served close to 6,000 children and adolescents through 56 programs in 25 states.

Diabetes camps let kids feel like kids again. At these special camps, everyone has diabetes, they speak the lingo, and they get it like no one else does. Camps are safe. They are staffed with volunteer medical staff who tracks blood sugars and insulin doses
throughout the week. The camp counselors are often former campers, and are role models for the campers who attend.

We offer a variety of camp programs. From day camps for young children, to one and two week overnight sessions for older kids, there is a program for everyone. Our goal is to ensure children with diabetes feel supported and grow to be happy and healthy.
