Diabetes Technology: Individualization + Education

Diabetes technology should be individualized based on a person’s:
- Needs
- Desires
- Skill level
- Access to technology

Provide people with diabetes or caregivers ongoing training and regular evaluation of techniques.

**Ongoing Training**

Support students at school in the use of diabetes technology prescribed by their diabetes care team.

**Regular Evaluation of Technique**

Initiate diabetes technology early when appropriate (based on person’s/caregiver’s needs and preferences).

**Adjust Therapy**

Diabetes technology may include:
- Continuous subcutaneous insulin infusion (CSII)
- Continuous glucose monitoring (CGM)
- Connected insulin pens
- Automated insulin delivery systems (AIDS)
- Smart and connected meters, digital apps
