Screening for Chronic Kidney Disease in People with Diabetes

About 1 in 3 adults living with diabetes has CKD.

CVD and mortality are higher in people with CKD.

Diabetes is the leading cause of CKD in the United States.

Screening for CKD in Diabetes

Who?

- ✓ Everyone with type 2 diabetes
- ✓ Everyone with type 1 diabetes for five years or longer

How?

Spot UACR and eGFR

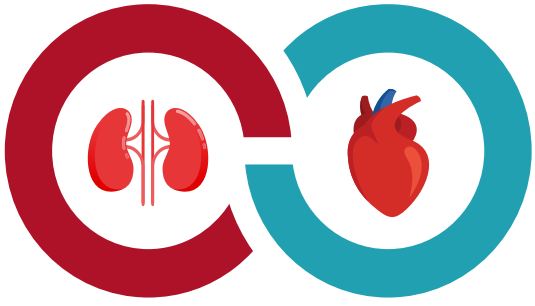

When?

Annually

Why Manage CKD?

Decreases risk of CKD progression

Reduces cardiovascular risk

CKD = Chronic kidney disease CVD = Cardiovascular disease UACR = Urinary albumin-to-creatinine ratio eGFR = Estimated glomerular filtration rate
